1.1.3. Return Fields

Attribute name		Type	Instructions
data	cityCode	String	City ID
	cityName	String	City name

json example

```
{
  "success":true,
  "code":"0",
  "message":""
}
```

```
"data":[
  {
    "cityCode":"110000000000",
    "cityName":"Beijing City"
  }
]
```

1.2. Query project information (getBuildings)

1.2.1. Method Description

Under a single city, specify the product line and field name to give a list of project information.

POST [/v1/adresource/getBuildings](#)

1.2.2. Request Fields

Attribute Name	Type	Instructions	Restriction
cityId	String	Standard city ID, e.g. Shanghai (310000000000)	required
pageNo	Integer	Page number, greater than 0	required , > 0
pageSize	Integer	Page size, greater than 0	required , 0 < pageSize ≤ 100
productName	String	Product line, e.g. SMART_SCREEN	required
showFields	Map<String,Object>	Display fields, for example: "buildingId":"","buildingName:"	required

json example

```
{
  "cityId":"370100000000",
  "pageNo":1,
  "pageSize":10,
  "productName":"SMART_SCREEN",
  "showFields":{
    "buildingId": "",
    "buildingName": ""
  }
}
```

1.2.3. Return fields

Attribute name		Type	Instructions
totalCount		int	Total Quantity
totalPage		int	Total pages
pageNo		int	Page number
pageSize		int	Page size
data	buildingId	long	Project ID
	buildingName	String	Project Name
	version	String	Version number

json example

```
{
  "success":true,
  "code":"0",
  "message": "",
  "data":{
    "totalCount":374,
```

```
{
  "totalPage":374,
  "pageNo":1,
  "pageSize":1,
  "result":[
    {
      "buildingId":"248",
      "buildingName":"Dashun Tiancheng"
    }
  ]
}
```

1.3. Get valid location information under the project (getValidLocations)

1.3.1 Method Description

Get valid point information under the project

POST </v1/adresource/getValidLocations>

1.3.2. Request Fields

Attribute Name	Type	Instructions	Restriction
cityId	String	Standard city ID, e.g. Shanghai (3100000000000)	required
productName	String	Product line, for example: SMART_SCREEN	required
targetIds	String array	List of placement project or point IDs	required, UniqueElements
targetType	String	Placement target type,	required

		BUILDING	
--	--	----------	--

json example

```
{
  "cityId":"370100000000",
  "productName":"SMART_SCREEN",
  "targetIds":[
    "248"
  ],
  "targetType":"BUILDING"
}
```

1.3.3. Return field

Attribute Name	Type	Instructions
locationId	String	Point ID
buildingId	String	Project ID
buildingName	String	Project Name
siteName	String	Building Name
unitName	String	Unit Name
installLocation	String	Screen installation location
deviceStyleId	String	Model number
deviceStyleName	String	Model name
locationDesc	String	Screen detailed location

json example

```
{
  "success":true,
  "code":"0",
```

```
"message": "",
"data": [
  {
    "locationId": "8767383",
    "buildingId": "248",
    "buildingName": "Dashun Tiancheng",
    "siteName": "Building 1",
    "unitName": "Unit 1",
    "installLocation": "Inside the car of elevator No. 1",
    "deviceStyleId": "303",
    "deviceStyleName": "[Smart] 25-inch Digital",
    "locationDesc": "In the car of the passenger elevator No. 1, Unit 1, Building 1, Dashun Tiancheng / Front"
  },
  {
    "locationId": "8767384",
    "buildingId": "248",
    "buildingName": "Dashun Tiancheng",
    "siteName": "Building 1",
    "unitName": "Unit 1",
    "installLocation": "Inside the car of elevator No.2",
    "deviceStyleId": "288",
    "deviceStyleName": "[All in One] 19-inch Digital",
    "locationDesc": "In the car of the No. 2 passenger elevator in Unit 1 of Building 1 of Dashun Tiancheng / In the car of the passenger elevator / Front"
  },
  {
    "locationId": "8767385",
    "buildingId": "248",
    "buildingName": "Dashun Tiancheng",
    "siteName": "Building 1",
```

```
"unitName":"Unit 2",
"installLocation":"Inside the car of elevator No. 1",
"deviceStyleId":"288",
"deviceStyleName":"[All in One]19-inch Digital",
"locationDesc":"In the car of the passenger elevator No.1 in Unit 2 of Building 1 of
Dashuntiancheng / Inside the car of the passenger elevator No.1 / Front"
}
]
}
```
